

My First Publication

Introducing My First Publication (MFP) program

Done with research/dissertation/project, find your reference papers and authors inspiring but... have no idea how to be an author yourself?

It is commonly recognized that most research students are capable of working hard but are not able to communicate their research effectively. The task of writing is usually taken up by peers. That does provide a guide to a successful writing but in the process, there's always a possibility of the scientific writing skills of the student not being developed to the full potential.

My First Publication is an effort of iscience to encourage scientific writing among undergraduate

and post graduate students through a dedicated journal '**Integrated Science Advances**' which is a specialized journal for publication of research, designs, concepts and innovation advances by the undergraduate and postgraduate scholars from all branches of science and technology.

The journal invites research articles as full length research papers, (mini) reviews, short communications and opinions from all areas of science and technology:

Chemistry, Biology, Medical, Physics, Mathematics, Botany Zoology, Biotechnology, Microbiology, Medical Biotechnology, Medical Microbiology, Genetics, Environmental Biology, Materials Science, Nanotechnology, Nanoscience, chemical engineering, mechanical engineering, electrical engineering, electronics, computer science and engineering, communication, information engineering and all other allied science advances.

Best paper Award: Selected article would be given a 'Best Article award' – with certificate and mementoes/books as awards (see detailed information on <http://pubs.iscience.in/award>).

Join as **Student Editor:** Ph.D. students with good writing and editorial skills are invited to join as Student Editors (see details at <http://pubs.iscience.in/studenteditor>).
